4. Future Plan for Creating a Base-type Smart City

Status of Goyang Smart City

01 General Status of Goyang Special City

Size

268.08 Km² (2.6% of Gyeonggi-do Province)

| Deogyang-gu 165.58km², Ilsan-dong-gu 59.95km², Ilsan-Seo-gu 42.56km²

Population / households

1,074,705 (domestic population) /

460,173 households

Administrative districts

Three districts Deogyang-gu/Ilsan-dong-gu/Ilsanseog-gu (44 viallages in total)

financial size

\$2.6498 billion

| general accounting \$2.4326 billion | special accounting \$546.05 million

Perfect Logistics Transportation

Adjacent to Incheon International Airport, the world's No. 1 Northeast Asian HUB for 12 consecutive years

Abundant high-level manpower

70% of Korea's R&D centers in the metropolitan area, and 113 universities are located, so it is possible to secure excellent human resources.

Optimal Enterprise Environment

Active support from the central government
Various incentives in the Gyeonggi Free Economic Zone

High quality of life

Rich settlement conditions by creating perfect living infrastructure that meets international standards

02 What is a Smart City?

A smart city is a sustainable city that provides various urban services based on urban infrastructure built by converging and combining construction • information communication technologies to improve the city's competitiveness and quality of life.

(Act on Smart City Creation and Industry Promotion, 2021)

04 Major process of Goyang Smart City

From Goyang U-City to Goyang Smart City !!

- Siksa, Deoki districts ✓
2008 ~ 2012
- Samsung district ✓
2010 ~ 2017
- Jichook, Hyangdong, Deokeun district ✓
2016년 ~ 2020

Goyang Ubiquitous City

Establish U-City in Siksa district and Deoki district	Establish U-City in Samsung district	Establish Goyang Ubiquitous urban plan	Opening the Civil Safety Center Integration of CCTV Recordings	Establish U-City in Jichook, Hyangdong, Deokeun districts	Establish IoT convergence pilot complex
2008 ~ 2012	2010 ~ 2017	2013	2015	2016 ~ 2020	2016 ~ 2017

Goyang Smart City

Implement smart city Living Lab project	Establish Goyang smart city plan	Creation of new deal regeneration of Smart City in Hwajeon area	Creation of Goyang Ilsan TechnoValley (Expected)
2018년 ~ present	2019	2023	2026

05 Goyang Smart City Creation Project

“ Development Project for IoT Convergence/Complex “ provide various IoT services to citizens by building sensors throughout Goyang City

Names of services

1st Development Project

- Smart park environment service**
* Environmental security light, safety fountain, lake management
- Smart living environment service**
* Safe daycare, air quality monitoring service
- Smart ecological environment service**
* Biomass odor monitoring
- Safe parking service, etc.

2016

2nd Development Project

- Smart waste collection management solution
- Multi-Environmental streetlight service
- Smart quarantine service, etc.

2017

Major IoT Development Project

Current Status of Goyang Smart City Living Lab

01 Purpose of Living Lab Promotion

Need to discover and expand citizens' tangible services after the IoT pilot complex construction Project in Goyang, "Start building Goyang-type Living Lab system(2018)"

Why does Goyang continue to promote Living Lab?

Regeneration of the old city center and evolution into a smart city

Test-bed role for SME technology development

Resolving local issues such as transportation, environment, and health care, etc.

02 Goyang Smart City Living Lab : Process

01 Problem Discovery Living Lab

- ▶ Search for solutions by discovering local problems through the operation of citizen solution groups

02 Problem-Solving Living Lab

- ▶ Problems discovered by citizens are solved with solutions that apply the company's cutting-edge technology

Process for Problem Discovery Living Lab

1 Recruitment and selection of citizen solution groups

- Recruitment and selection of citizen solution groups

2 Problem definition and site survey

- Interview with local residents, survey
- local residents meeting, on-site inspection

3 Specifying the Problems

- Masang Park turned into crime – hidden zone
- Illegal dumping of garbage in Haengsin 2-dong

4 Finding Solutions

- Finding a solution by collecting residents' opinions
- Gathering expert opinion and technical advice

5 Prototype Experiment

- Prototyping, installation, testing
- Deriving RFP for each of task

03 Goyang Smart City Living Lab : Process

Living Lab Business by Year (2018 ~ Present)

- [Hwajeong 2-dong] Improving the illumination of pedestrian roads in the inconvenient traffic area
- [Pungsan-dong] Reduction of fine dust in public facilities for the elderly and children
- [Daehwa-dong] Improved illegal dumping of garbage
- [Gwansan-dong] Improving pedestrian safety through IoT smart pedestrian path installation

2018

- Demonstration of integrated waste management solution service for efficient waste treatment
- Demonstration of smart pedestrian road IoT for elementary school students' pedestrian safety

2019

2020

- New problem discovery project
 - Dreaming Dandelion / Dream Home / Restart
- Social problem-solving living lab project
 - Infectious disease prevention/ disability prevention service
- Carbon Reduction Living Lab Project

2021

- Problem Solving Living Lab
 - One-way reverse driving alert
 - Cancer patient health care service
- Problem Discovery living lab
 - Little Goyang Citizen / Dream Home / Haengsin 2-dong Residents' Association

2022

- Problem Solving Living Lab
 - Garbage dumping prevention service
 - Solar lighting bench service
- Problem Discovery living lab
 - USCREATE/ Gajwa Love Residents Association

“Smart Insol Location Service(KKO-KKASIN)”

- ▶ 58% were not found after 12 hours of Disappearance
- ▶ Classified as long-term disappearance after 48 hours of disappearance
- ▶ Disappearance of people with developmental disabilities
20's 30.7% > 30's 23.9% > teenagers 16% > over 40's 16%

Why shoes?

If your child is young or unable to speak due to a disability, please wear a missing child prevention product. When writing your name and contact information, it is better to engrave it on the inside of clothes or the soles of shoes that are not easily visible from the outside. This is because it is easy for strangers to access and can lead to kidnapping.

Looking for a person with visually impaired

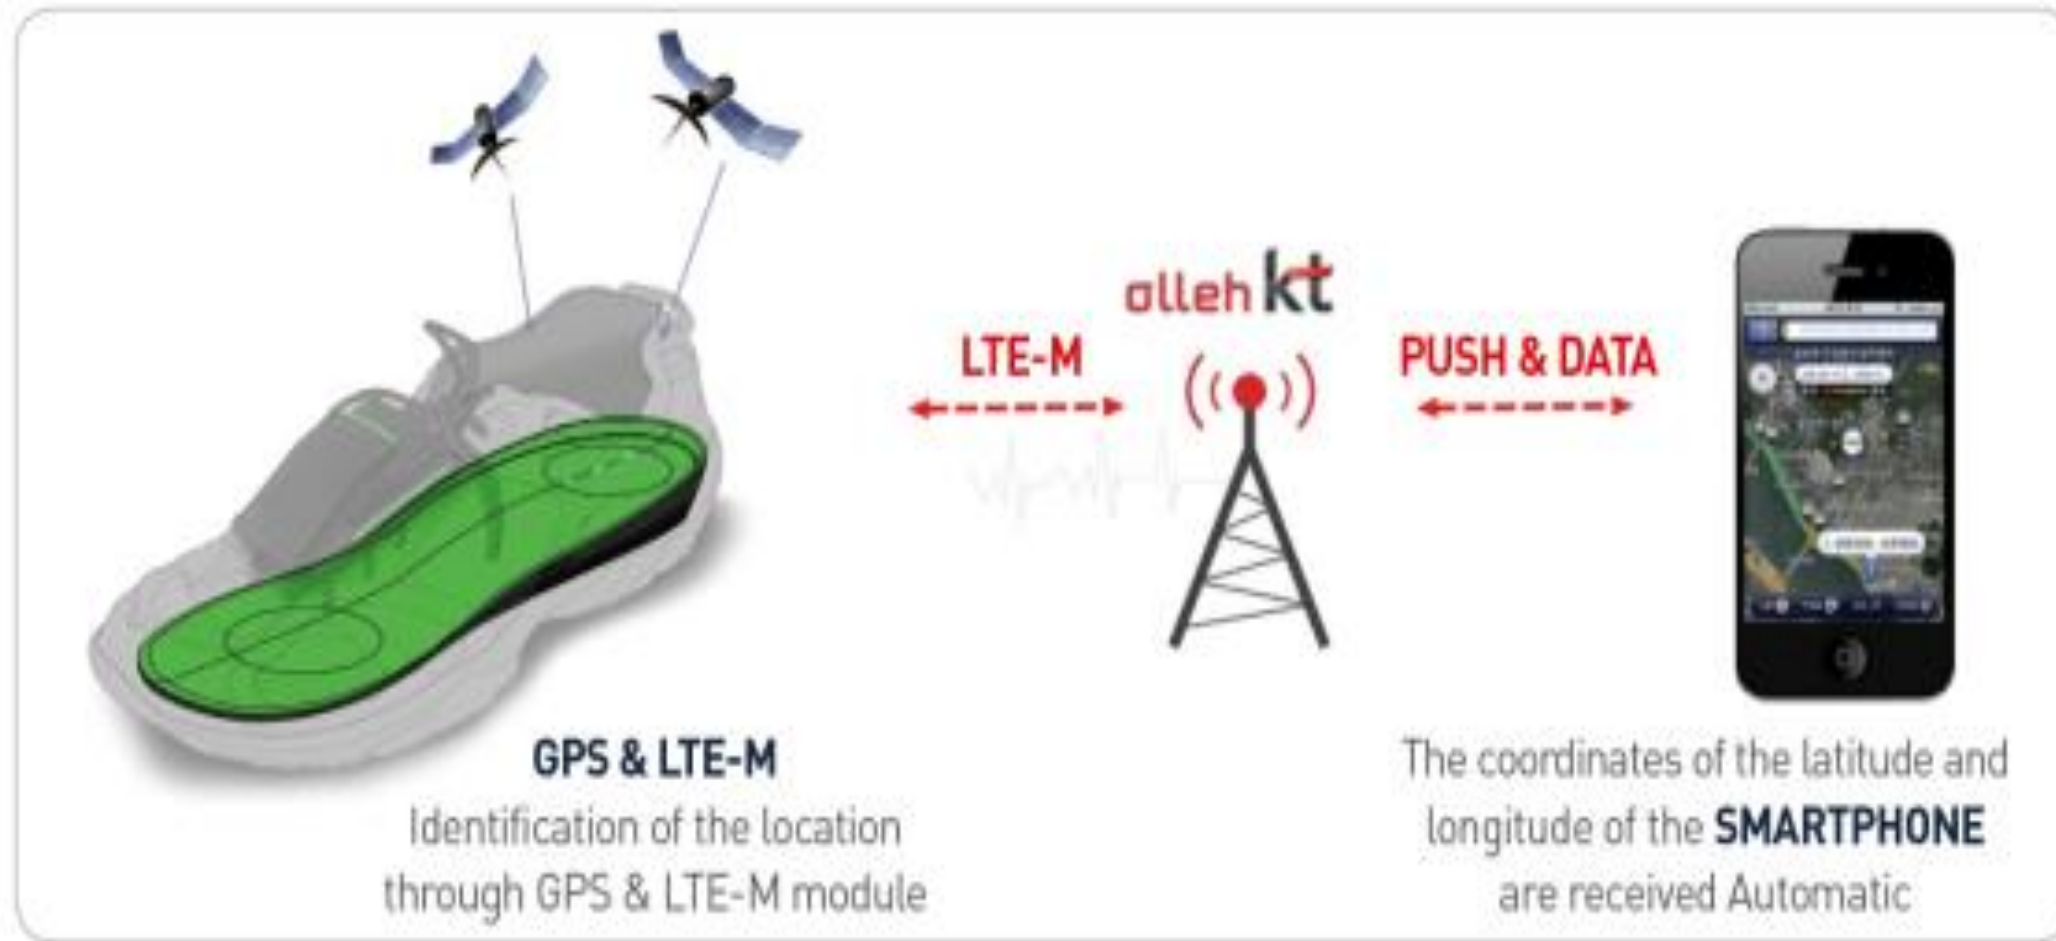

Black basketball shoes

White basketball shoes

Missing person

'스마트리빙랩' 사업으로 탄생한 마상공원 새 명소 태양광으로 조명-스크린 밝히고 휴대전화도 충전 문제발굴부터 해결까지 시민해결단 적극 참여 고양산업진흥원은 지역기업 연결 "모두가 윈윈"

마상공원 마상교에 새로 만들어진 태양광 스마트벤치.

[고양신문] 주교동 주력가 뒷동산이자 주민들의 산책코스인 마상공원의 한가운데, 고양시청 쪽 공원길과 원당초등학교 쪽 공원길을 이어주는 보행다리인 마상교 바로 옆 너른 공터에 전에 없던 쉼터가 만들어졌다. 나란히 놓인 두 개의 벤치 사이에 고양고양이 캐릭터 조형물이 반갑게 웃고 있다. 바로 옆에는 여러 사람이 둘러앉을 수 있는 평상이 두 개나 놓였다. 자세히 보니 여느 벤치와는 뭔가 좀 다르다. 벤치 상부의 태양광 패널이 힌트다.

고양시 '2023 월드 스마트시티 엑스포 어워즈' 선정

태양광 지능형 벤치 우수성 입증

고양시청사. (사진=고양시 제공)
[고양=뉴스시스] 송주현 기자 = 경기 고양시는 세계 60개국 200여개 도시와 기업이 참여하는 '2023 월드 스마트시티 엑스포 어워즈'에서 우수 기관으로 선정됐다고 8일 밝혔다.

Recipient of the 2023 World Smart City Awards in the City category (September 7, 2023)

Solar-Powered lighting bench Living Lab Video

04 Summary of Achievements

1 Smart city services for solving local issues in Goyang City have spread nationwide

- Smart IoT pedestrian paths for elementary school students' safety → Won the 2020 Resident Life Innovation Case Champion award → Expanded to Sejong City, Gumi City, etc.

2 Connecting the local issues identified with citizens to the problem-solving Living Lab project and continuously pushing forward as smart city services

- Local issues identified in 2021 → Completed as a problem-solving Living Lab project in 2022

3 Leading the way in fostering a culture where Goyang citizens can continuously participate in the realization of a smart city, promoting citizen leaders' development

- Selection of 'Smart Citizens' in which community council members, village activists, and any interested residents can participate, with support for community activities provided (from 2021 onwards).

4 Driving corporate growth by providing service demonstration opportunities to companies participating in the Living Lab

- The smart IoT and pedestrian path installation products were designated as recommended innovative products by the Patent Office in 2020 (ITS Bank Co., Ltd.) → Increased Sales
- Products from three companies participating in the Smart Living Lab were designated as innovative products by the Public Procurement Service in 2023, resulting in significant achievements.

05 Implications

1

Establishing a close collaboration system between the Goyang City's supervising department and the executing and managing institutions

- From the stage of establishing the Living Lab project plan to demonstrating the solution, all processes were closely coordinated with relevant departments of Goyang City

2

The Local business promotion agency plays a bridging role between the local government ↔ companies ↔ citizens

- From Beyond the role of the project management institution, they serve as a bridge between stakeholders throughout the project process, mediating and coordinating disagreements and differing opinions

3

Establishing Goyang City's unique process through various Living Lab methodological approaches

- Experimenting with Living Lab projects in various ways, such as operating entities and methods of citizen participation → Settling an optimized Living Lab process unique to Goyang City

4

Implementing sustainable smart services through technology demonstrations based on citizen demands

- From the problem-solving stage, discussions with demand agencies and maintenance departments to establish sustainable services

Future Plan for Creating a Base-type Smart City

01 Concept of Creating a base-type smart city

The base-type smart city is a project to create a smart base that can enhance regional competitiveness and lead the spread of smart cities, and will be created at a scale of 40.2 billion Korean won for three years

Project Name	Creating a base-type smart City of Goyang Special City
Location	Goyang Special City
Project Area	268.08 square kilometers
Project Duration	August 2023 to December 2025

스마트도시거버넌스

GIPA 고양산업진흥원 이노베이션센터 운영

스마트 도시 서비스

- CityLabs 드론밸리 조성
- JW 진우산전 수요응답형 버스
- LABFIS 데이터 얼라이브 기반 교통 최적화 서비스
- 스마트 서비스 설계 자율주행 서비스 PMO, KPI분석
- 스마트폴 및 미디어 월

스마트도시인프라

- 한국국토정보공사 디지털 트윈 서비스
- kakaoenterprise 지능형 스마트 행정 스마트 데이터 플랫폼

Data Hub & Digital Twin-based S-Curve Smart City Construction

01

Governance

Key roles

고양시 이노베이션 센터

- 지역 주민, 이해 관계자 등 참여
- 시민 참여형 서비스 발굴 지원

시민 참여 리빙랩 운영

- 산·학·연·관 전문가 협의체 구성
- 자문·컨설팅, 기술개발 실증 지원

협업 거버넌스 운영

- 기업 실증 공간(Open Lab) 운영
- 경기·고양 데이터 분석 센터 운영

기업 지원 오픈랩 운영

- 홍보 및 성과 확산(WSCCE 참가 등)
- 신기술 체험 프로그램 운영

성과 확산 사업 홍보

▶ Establishment of Goyang Smart City Innovation Center

Data Hub & Digital Twin-based S-Curve Smart City Construction

02

Services

- ▶ Smart pole and Media wall, Demand-responsive and Autonomous Services
- ▶ Data-alive-based traffic optimization service, Establishment of Dron Valley

Smart pole and Media Wall

Demand-responsive and Autonomous service

Data-alive-based traffic Optimization service

Establishment of Dron Valley
